

## Wireless Credit Card Processing

Accept credit cards anywhere, anytime with a wireless merchant account from Total Merchant Services. Whether you have a service business that works at your customer's location or if you take your retail business on the road, wireless credit card processing is an easy and cost-effective way to break free from telephone lines and accept credit cards wherever your customers happen to be.

With a wireless merchant account from Total Merchant Services, you'll:

- No longer have to make time-consuming telephone calls for voice authorization.
- No longer have to remove your point-of-sale (POS) terminal equipment from your store and rent a telephone line at a remote location.
- No longer have to connect your POS terminals to a cellular telephone in order to complete a sale.
- No longer assume the risk of making credit card sales without on-site authorization.

### Many Benefits To Wireless

- Your customers will appreciate the ability to pay by credit card – particularly for unanticipated expenses.
- Complete more sales. You'll be able to make sales to customers who want to make an unplanned purchase or who don't have enough cash on hand.
- Wireless credit card authorization can take just two to five seconds to complete, compared to 15 to 20 seconds for dial-up POS terminals. That means you'll be able to complete your sales in less time.

- Wireless credit card authorization increases security for you and your staff by reducing the amount of cash you and your staff handle and hold during a typical business day.

### Wireless Brings More Flexibility

- There's no need to have telephone or electrical outlets nearby, so you can change the location of your payment systems as needed.
- When your cashiers get busy and lines grow long, use wireless terminals in conjunction with dial-up terminals to add additional payment locations.
- Wireless authorization terminals are easy and inexpensive to install. Once you've established a wireless merchant account or added a wireless terminal to your existing account, your terminal can be activated in a matter of hours.
- There's no need to call the telephone company for an additional telephone line, so you can be up and running right away.
