Payment Jack

Swipe your way to freedom

Introducing the fastest and easiest way to securely complete that transaction no matter where you are. The new Payment Jack application offers your customers the ease of effortless purchasing and lets you take advantage of the lowest card present rates. The Payment Jack application is fully encrypted from the app to the swipe device. Your credit card information is encrypted at the swipe, ensuring safety and security on every transaction.

Speed and Convenience

Payment Jack delivers the highest security possible and the convenience of a mobile phone. Available for use on over 400+ phones, Payment Jack is the definitive application for processing major credit cards like Visa®, MasterCard®, and Discover® all on your mobile phone. With features such as real-time authorization, emailed receipts, void, and online reporting, you can trust that your business is flying at the speed of business. Payment Jack gives you the lowest rates on credit transactions while rigorously protecting your customers' personal data. Remember the big one that got away? Never again. When you invest the time in getting a prospect ready to place a big order, wrap up the deal without delay by taking their credit card right then and there — using just your cell phone.

No additional hardware required

With Payment Jack you use your current cell phone and your current calling plan. The service works on all major cell phones. If you don't already have a data plan, you can simply pay-as-you-go for data usage. It's just pennies per transaction. Payment Jack also includes a web interface so you can securely enter credit card data from your PC or Mac's desktop.

Secure and fully compliant

Payment Jack adheres to the highest possible standards in payment security. Being PCI certified (Payment Card Industry), you can trust that your transactions are processed accordingly. All customer data is encrypted before it leaves your cell phone. No personal data is retained on your cell phone.

Key Benefits

- Quick activation
- No additional equipment costs
- Feature rich for the Merchant in mind
- Reverse Phone Lookup
- DES3 secure, PCI compliant

Payment Jack

Add a line, or two or three...

Mobilize your entire workforce

Maximize your sales and add as many sub-lines as your business requires. Add-a-lines is a tailored solution for any business with a medium to large sized mobile workforce. Ensure that you and your employees will be ready to accept credit cards no matter where or when. Payment Jack allows you to add as many lines to one account as needed.

Convenient Sales and reporting

The Enhanced Payment Jack portal gives you access to all activity on your sub-lines. Discover how much your workforce is selling and generate exportable transaction reports to keep track of your business progress.

With Payment Jack you can
- Quickly process credit card orders by swiping or keying in.
- Real-time authorization
- Log cash orders for reporting and receipts
- Email receipts to your customers
- Cross channel touch point
- Build up your customer list for future marketing efforts
- Check transaction history and reports on your phone or online.
- Automatically calculate Tip & Tax percentages into transaction totals.
- Signature Capture on touchscreen devices
